

Say Good Riddance to Downtime. Improve your organization's operational efficiency and IT reliability with a more proactive approach to IT.

BY THE NUMBERS

42% of CIOs feel their IT organization does not have the capabilities in place to get ready for the future.

71% said it's difficult to strike the right balance between innovation and operational efficiency and security.

80% of network outages are due to changes.

65% of IT budgets are spent just to keep the "lights on".

Overburdened teams need a way to relieve their current workload pressure. Many teams simply don't have the bandwidth to research and deploy new technologies, making it difficult for them to build a more agile IT organization. Greyson Managed Services removes the burden from your team and takes on those time-consuming generic tasks, so that you can focus on augmenting your in-house capabilities.

Greyson Managed Services can improve your company's IT by cutting down or even eliminating IT emergencies, thus avoiding unplanned downtime and reducing expenditures. We believe in a partnership with our clients that goes beyond taking away expenses and IT concerns. One that helps you achieve a deeper business-oriented outcome, one that allows your professionals to do what they do best—their core business.

Our managed services offerings are in place to help tackle wearying IT issues and strike the perfect balance within your organization. Recent studies show that when properly executed, managed services for IT can reduce in-house IT costs by 40% while also facilitating a 50-60% increase in IT efficiencies. Giving you more time to build an innovative IT organization, create new ways to drive your business forward, and more time to adopt new technologies. All while we focus on your IT infrastructure 24x7x365 keeping everything running smoothly.
